

# Fairforest Creek Watershed

(03050107-04)

This map illustrates the Fairforest Creek Watershed, showing its extensive network of streams and tributaries. Key features include:

- Monitoring Stations:** Numerous macroinvertebrate (triangles), water quality (inverted triangles), and groundwater (blue triangles) monitoring stations are marked throughout the watershed.
- Land Use and Management:** The map identifies various land types including wetlands (green hatched), public lands (green), and cities/towns (pink). It also shows the locations of mines (pickaxe icon), landfills (yellow square), and NPDES permits (green circles).
- Infrastructure:** Major transportation routes are shown, including Interstates (thick grey lines), Highways (thin grey lines), and County Lines (dashed grey lines). Railroad lines are indicated by black lines with cross-ticks.
- Hydrology:** The map displays streams (blue lines), modeled streams (pink lines), and 10-digit hydrologic units (black outlines). Lakes are shown in blue.
- Geographic Context:** An inset map at the bottom shows the location of the watershed within the state of South Carolina.

**Legend:**

- Macroinvertebrate Stations
- Water Quality Monitoring Stations
- Approved TMDL
- Groundwater Monitoring Stations
- Mines
- Landfills
- NPDES Permits
- Land Application Permits
- Natural Swimming Areas
- Lake
- Interstates
- Railroad Lines
- Highways
- County Lines
- Modeled Stream
- Stream
- Wetland
- 10-Digit Hydrologic Units
- Cities/Towns
- Public Lands
